MISSION

To maximize health in all policies among member municipalities within the framework of local government principles.

VISION

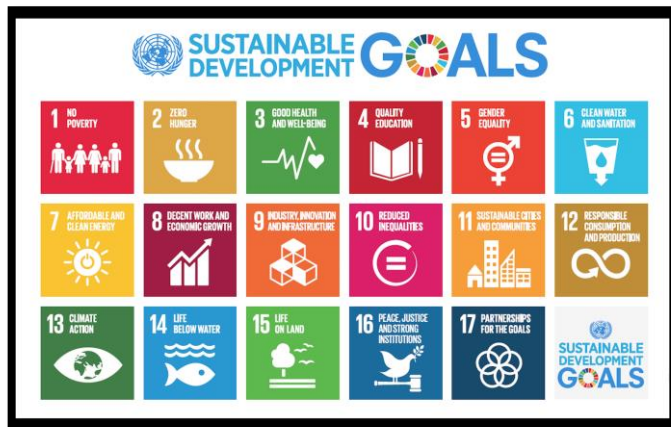

To contribute to the development of capacities of cities by using the strategies for creating a sustainable urban environment that focuses on health.

With the slogan of “Sustainable Development” and “Creating Sustainable Cities”, THCA brought together the member municipalities by organizing trainings, workshops, symposia, conferences, international congresses, competitions, award ceremonies and awareness activities on all urban and environmental issues that concern urban health. Knowledge and social awareness were sought to be created with the accumulations and results obtained through printed and visual publications.

Responsibilities and Service Areas Against Member Municipalities

The main topics that make up the areas of activity of our Association are:

- National and international representation
- Helping the development of dialogue and cooperation between the WHO European Healthy Cities Network and its member municipalities.
- Printed and visual publications
- Organizing education, seminars, panels, workshops, contests, award ceremonies, conferences and national and international congresses on municipalities and urban health issues
- Information and technical support meetings
- Consultancy to city health profile, city health development plan and urban carbon footprint inventory preparations
- Supporting or organizing scientific, sports, educational and cultural activities

How COVID-19 has impacted the work of the Network

- We couldn't do our meetings, conferences and workshops (only 2 council meetings)
- Changes at the work plan and use of budget
- Increasing work load of municipalities and changes using of budget and budget problems
- Difficulties of lack of information
- Difficulties of sharing informations with the members
- Questions about benefit of networks
- Difficulties to work at home
- Difficulties to work at office and to go to work
- Difficulties at online meetings
- We couldn't participate at the organizations we invited
- We couldn't visit our members (and potential members)

Biking New Transportation Option?

Moving around during the COVID-19 outbreak

While cities around the world are introducing a broad range of measures to limit physical contacts to prevent and slow down the COVID-19 pandemic, many people might still have a need to move around cities to reach their workplaces when possible, meet essential daily needs or provide assistance to vulnerable people.

Problems

- lack of sufficient information
- uncertainties
- changes at work plans
- non-existing budget
- lack of experience of the administrators
- lack of staff
- difficulties to work at home
- difficulties to work at office and to go to work
- difficulties at online meetings
- postpones of organizations and council meetings
- questions about benefit of networks

Determinations&Suggestions

- importance of networks
- municipalities have key role for supporting citizens
- supporting municipalities to prepare pandemic plans
- encouraging municipalities to produce projects by bringing them together
- spreading translations of international publications
- sharing examples of good practices
- preparing information brochures and guides

Determinations&Suggestions

- restructuring in local governments
- financial strengthening of the health affairs
- training of the personnel
- preparing and implementing urgent action plans for outbreaks
- determining the actions to be taken remotely
- conducting more studies on public health issues
- making plans for the development of agricultural production
- developing systems that can be accessed quickly by the citizens

Determinations&Suggestions

- cooperation, common working culture
- producing common solutions
- new strategies for Healthy Cities
- oppurtunity fight jointly not only against the pandemic but also with global warming, climate change, global poverty, global hunger, and endangered creatures
